

I am gravely concerned about the proposed changes to the ownership rules of media in a given area. At a time when diversity of opinion and points of view is more important than ever, the proposed change would further erode the availability of indepth information. As it is most news and information presented to the public is at the "least common denominator" level. We are given sound bites and headlines, not information. Please, do not allow a small handfull of media corporations to control, or limit, free speech, diversity of opinion and the content of the information presented to we the people.
